Education

Bachelor's Degree in **Software Engineering**
Al-Hussein Bin Talal University, Jordan, **01/2016 - 01/2020**

Languages

Arabic: Mother Tongue
English: Very Good

Skills

- Laravel
- Livewire
- API
- PHP
- Tailwind CSS
- Alpine JS
- Web Development
- Software Engineering
- Front-end
- Back-end
- Project Management
- Problem-solving
- Communication
- Teamwork
- Time Management
- Adaptability
- Creativity
- Critical Thinking

Professional Summary

Software engineering graduate with a strong foundation in web development and a passion for continuous learning. Skilled in Laravel, API integration, and front-end technologies like Tailwind CSS. Experienced in project management and problem-solving, with a focus on delivering high-quality results. A team player with excellent communication and adaptability to new challenges.

Work Experience

Learning Management System
Classera, Jordan
July 2024 - Present

- **Server-Side Development:** Built and maintained robust server-side applications to support high-traffic e-learning platforms.
- **Database Management:** Managed and optimized database interactions to ensure efficient data storage and retrieval.
- **API Development:** Created and integrated RESTful APIs to enable seamless communication between client applications and backend systems.
- **Performance Optimization:** Enhanced backend performance through efficient coding practices and regular code refactoring.
- **Security Implementation:** Implemented security measures to protect data integrity and prevent unauthorized access.

Web Developer Solution (Full Stack)
SP-Apps, Jordan
2023 - July 2024

- **Front-end Development:** Responsible for creating user-friendly interfaces using HTML, CSS, and JavaScript.
- **Back-end Development:** Developing server-side logic and integrating databases to ensure seamless functionality.
- **Testing and Debugging:** Conducting thorough testing and debugging to identify and resolve any issues.
- **Collaboration:** Working closely with designers and other developers to achieve project goals.
- **Continuous Learning:** Staying updated on industry trends and technologies to enhance skills and knowledge.

What I Do In SP-Apps?

- Developing API for Mobile
- work on fillit app from scratch this app is for drawing character and inside app there's likes , comment also user can make block for another user and can make following and follower inside app and more ...
- make an admin panel for dubai prayer app using Laravel , filament php , tailwind css
- make happiness factory project using laravel , livewire , tailwind css , alpine js
- make updates for project CVUME that is made by codegnitor4
- make a blogs for CVUME using Laravel , livewire , tailwind , filament
- make edits for carers projects admin panel and API for mobile
- connect project with linode server and docker
- DRSAS Dentist Project: Appointment booking project for patients, dentists and university students

Expertise

- React js
- HTML5
- CSS3
- Ajax
- Bootstrap
- JavaScript
- Jquery
- JSON
- GitHub
- OOP
- Mysql
- Eloquent ORM -Laravel
- Lumen
- Filament php
- Codeigniter
- Google Tag Manager
- Google Analytics
- Zend Framework
- jwt
- sunctm
- Oauth2
- cake php
- Trello
- Bitbucket
- Confluence
- SOLID principles & design patterns

Achievements and Awards

- Help a group of student to learn web development
- Meeting the president of the university and signing my graduation notebook and congratulating

legislation management system

Qistas, Jordan

2021 - 2023

- **Full Stack Development:** Developed and maintained full stack web applications using modern frameworks and technologies to enhance user experience and performance.
- **API Integration:** Integrated third-party APIs and internal services to streamline data exchange and improve application functionality.
- **Responsive Design:** Implemented responsive and dynamic user interfaces using HTML, CSS, JavaScript, and front-end frameworks to ensure compatibility across devices.
- **Backend Development:** Designed and managed server-side logic and database interactions using php and other backend technologies.
- **Code Optimization:** Enhanced code quality and performance by implementing best practices and performing regular code reviews and refactoring.

What I Do In Qistas?

- Work with workflow technology (tools for make design)
- Developing API for Web
- Make improvements in the main project Using Zend Framework
- Work With Database
- Developing screens that qistas needed to improve their services
- Work with Admin Panel for qistas
- make design of main website of qistas
- work on LMS project (legislative management system)

Courses And Certifications

Laravel Fundamentals Course on Udemy | Udemy
Skills Gained: In this course, I gained a solid understanding of Laravel, a popular PHP framework. I learned how to build web applications using Laravel, implement authentication, and work with databases.

Filament PHP Course on YouTube | YouTube
Skills Gained: Through this course, I enhance my knowledge of Filament PHP and learned how to create dynamic web applications using this framework.

Livewire Course on YouTube | YouTube
Skills Gained: I acquired skills in Livewire, a full-stack framework for Laravel, enabling me to build interactive web applications with real-time features.

Tailwind CSS and Alpine JS Course on YouTube | YouTube
Skills Gained: Through this course, I learned how to use Tailwind CSS for styling web applications and Alpine JS for adding interactivity and dynamic features.

API and Advanced PHP Course on YouTube | YouTube
Skills Gained: I gained expertise in working with APIs and advanced PHP techniques, allowing me to create robust and efficient web applications.

Angular Course on YouTube | YouTube
Skills Gained: In this course, I learned how to develop dynamic single-page applications using Angular, a powerful front-end framework.

Go Language
Skills Gained: Developed the ability to write efficient, concurrent, and statically typed programs using the Go programming language (also known as Golang).

6 Levels of English and Conversations – JUGATE Academy, Jordan
Skills Gained: Enhanced English language proficiency across grammar, vocabulary, reading, writing, listening, and speaking.

Personal Projects

- (Graduate Project) We Build an VR Application To calculate the length and shortness of the eye and color blind using Unity engine.
- CMS Laravel Project CRUD Application
- Project for Sells Animal This Was A training For Me
- Project build with Ajax and Jquery (CRUD Website)
- Front-End Project
- TailwindCss project (https://eyadoo98.github.io/TailwindCssProject/)
